A good pool cover is the essential finishing touch to your pool. What's more, it can save you up to 70% of the energy cost, your pool water stays clean and the pool is made safer for children and pets. The Starline Roldeck offers you more

The most attractive, safest pool cover

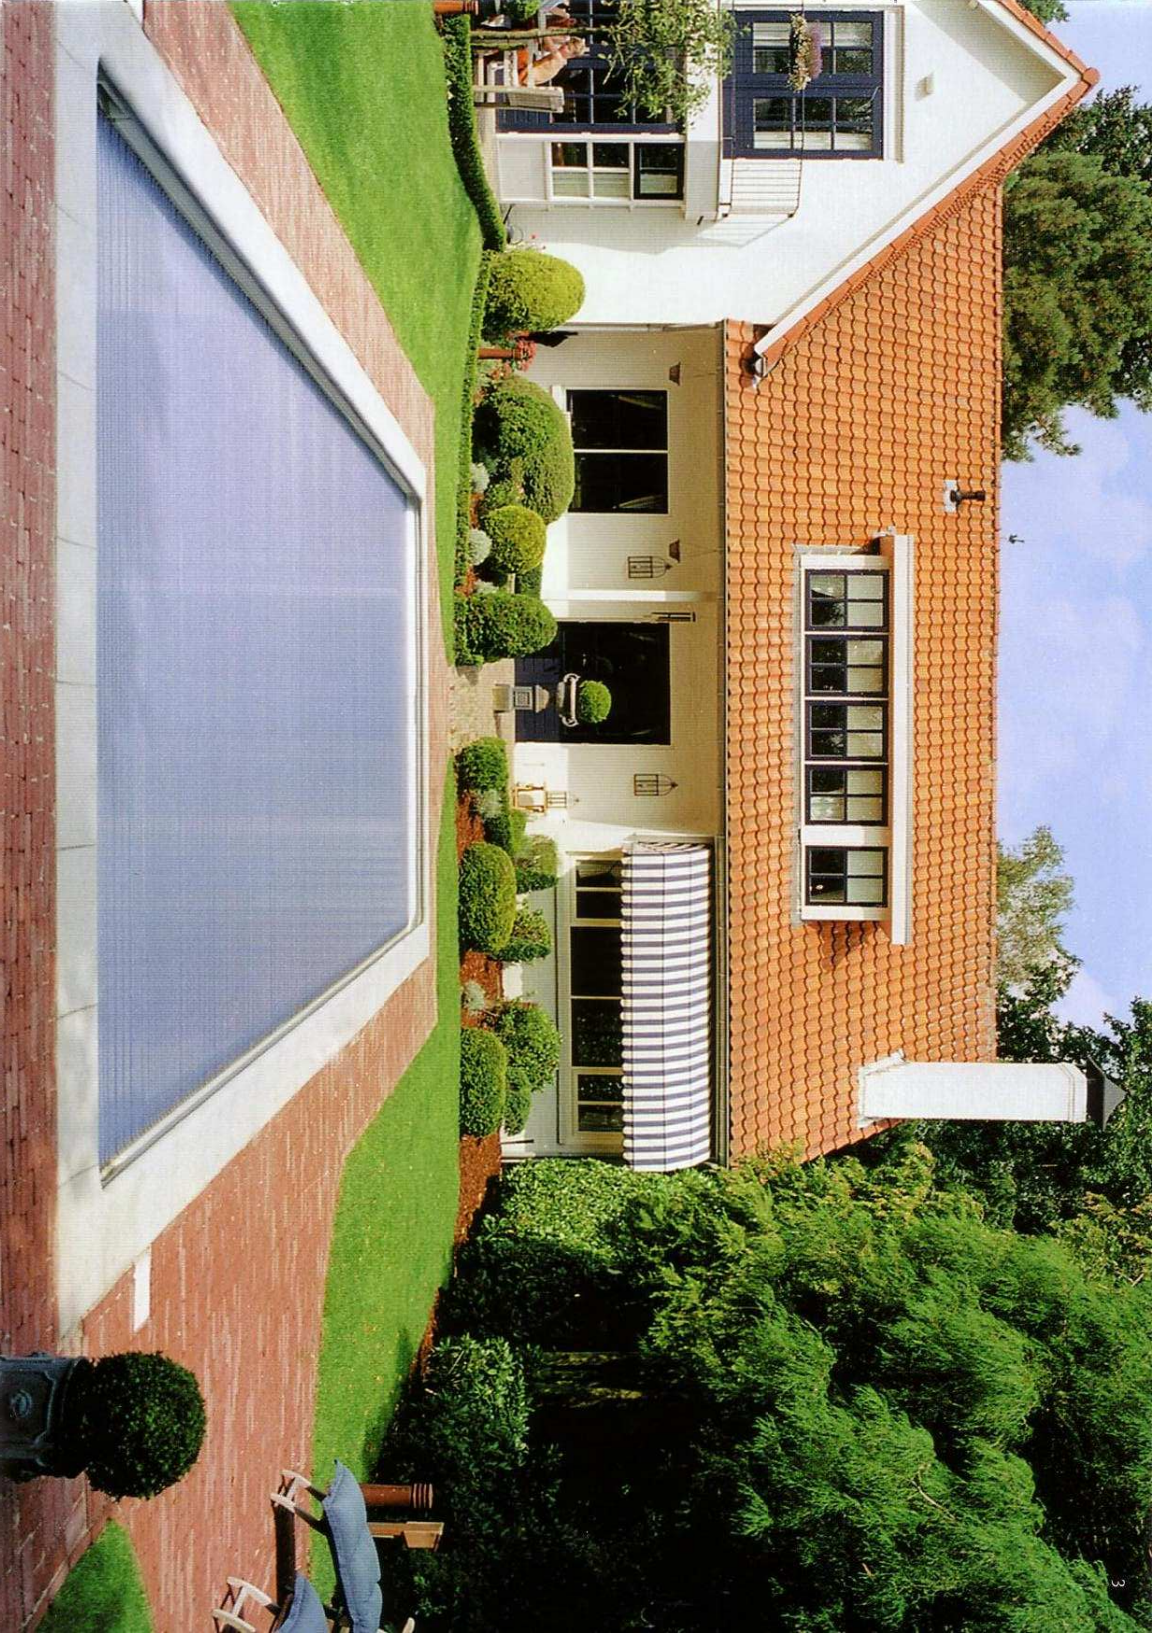

than convenience and durability. This cover is by far the most attractive solution for the protection of your swimming pool. The streamlined design of the floating slats adds to the aesthetic value of your pool. Starline Roldeck offers you several options that have at least one thing in common: Starline's unrivalled quality.

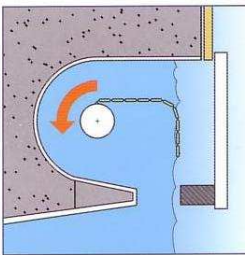

STARLINE. RELAXING LUXURY

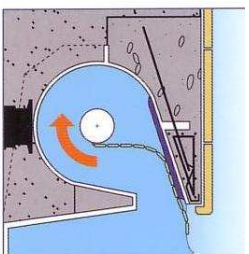

STARLINE

With some other laminated covers, a hood protrudes visibly above the patio and forms an unsightly obstacle.

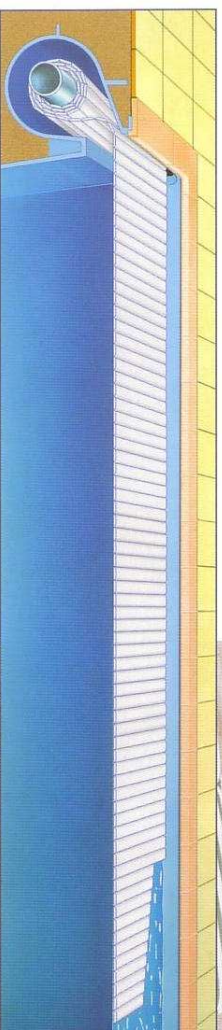

Starline Roldeck can be completely hidden away below the patio.

The Starline Roldeck consists of a system of floating laminated slats rolled around a stainless steel axle. Opening and closing the cover is automatic and silent. The drive and rolling mechanism are completely integrated into the swimming pool, and hidden from view. Sophisticated technology and a special

Invisible mechanism

recess in the swimming pool make it possible to install the Starline Roldeck completely below the water level. The many options available make the Starline Roldeck particularly attractive for swimming pools of all types and dimensions.

Luxury and convenience, at your service. A Starline Roldeck is the most practical and comfortable pool cover imaginable. The silent motor is engaged at the

At the press of a button...

single press of a button. As soon as the cover is fully open or closed, the motor stops automatically. You can also stop the movement of the cover at any time.

Wireless Remote control is available, making operation as easy as locking or unlocking your car. The ease of operation means your swimming pool can easily be covered for shorter periods. Therefore, you not only have ease of use but also considerable additional energy savings and you need spend less time on pool maintenance. Not only good for you, but also for the useful life of your swimming pool.

The Starline Roldeck is a unique system that can be used with swimming pools of virtually any shape or dimensions. Indoor or outdoor, large or small, there are

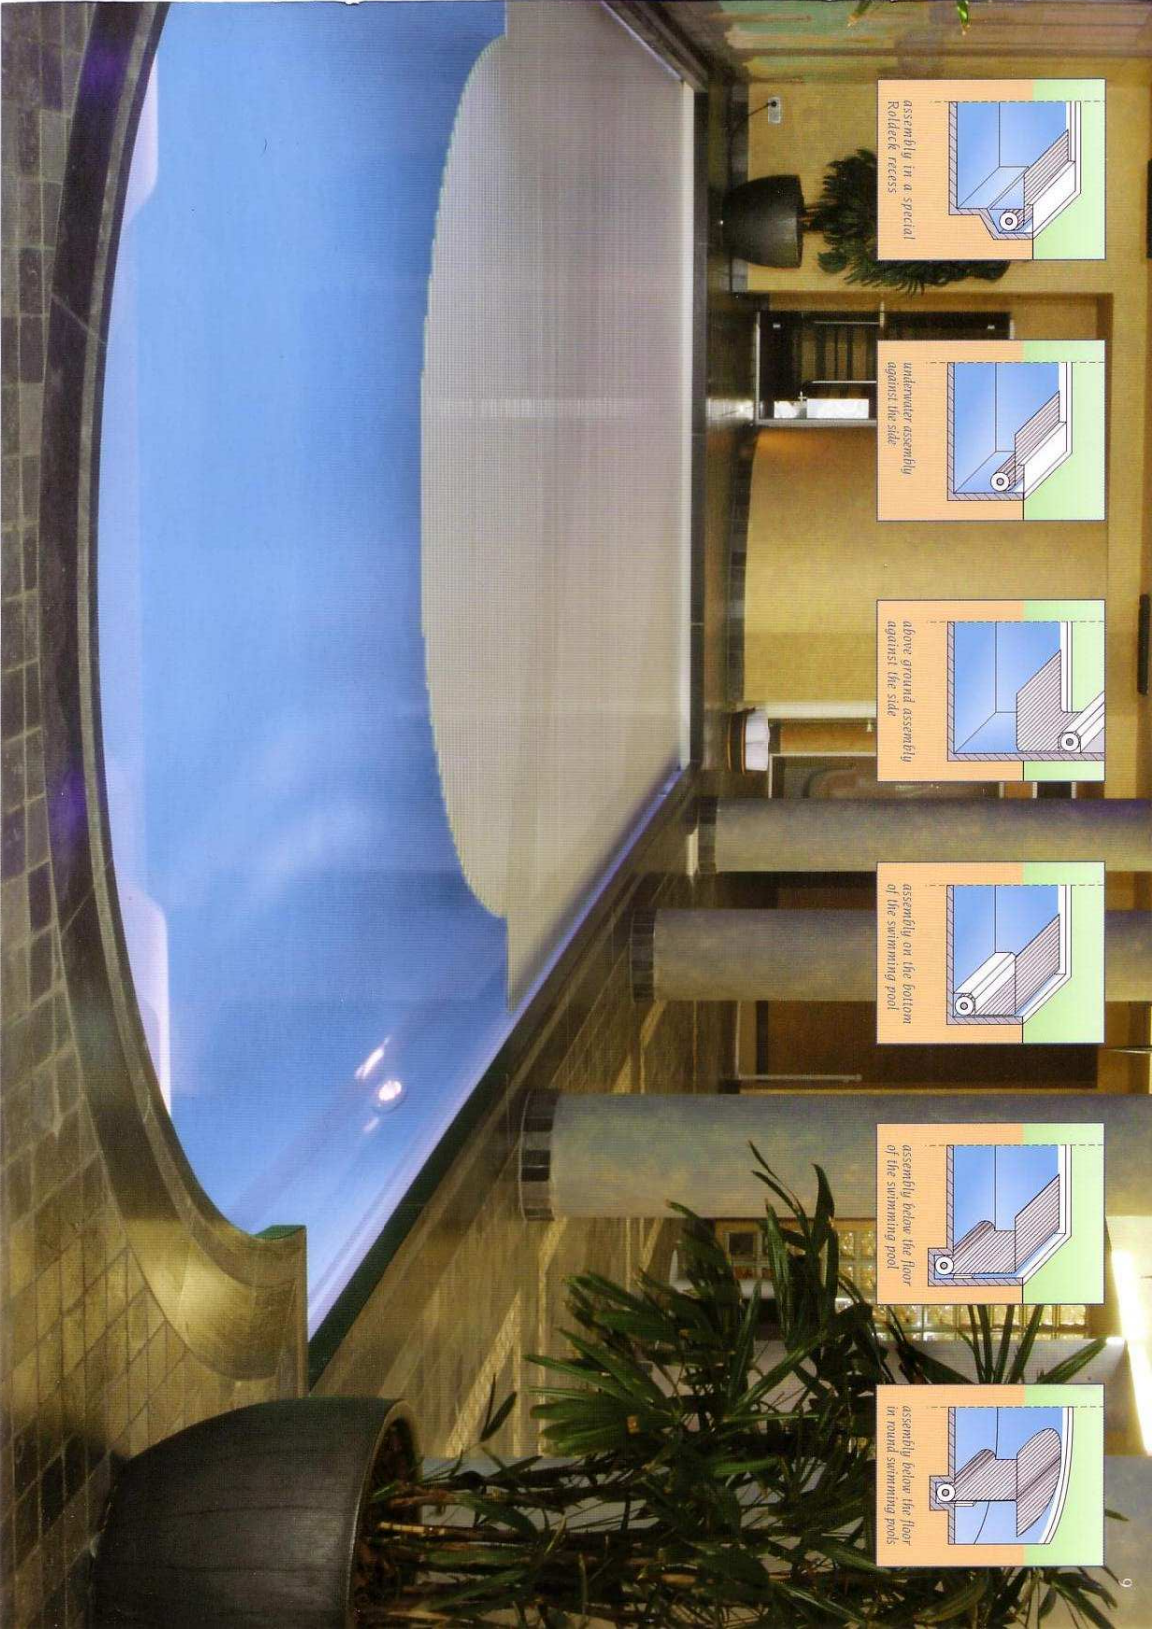

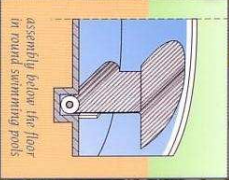

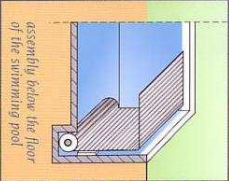

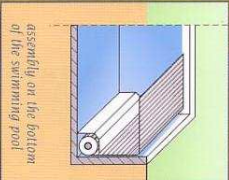

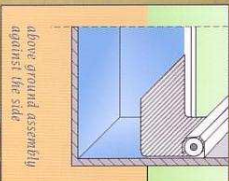

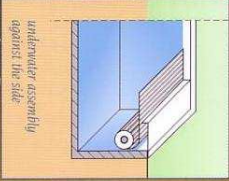

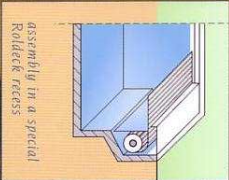

One system, many possibilities

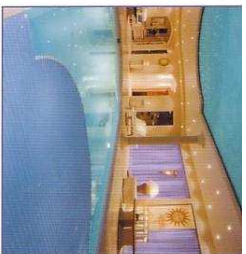

hardly any limitations. Your Roldeck is produced to fit your pool like a glove, using modern computer technology. Whether you have a polyester liner or tiled pool, a Starline Roldeck is the ideal swimming pool cover. The Starline Roldeck can be installed in various ways. The illustrations above show some of the possibilities - from left to right:

STARLINE, RELAXING LUXURY

Starline Roldeck is available in a range of versions and colours. While solid laminated slats block out light and counter the growth of algae, transparent slats in combination with underwater lighting make for a spectacular sight. For this reason, transparent laminated slats are particularly suitable for indoor pools. For outdoor pools a special 'solar' edition is available. With the laminated solar slats,

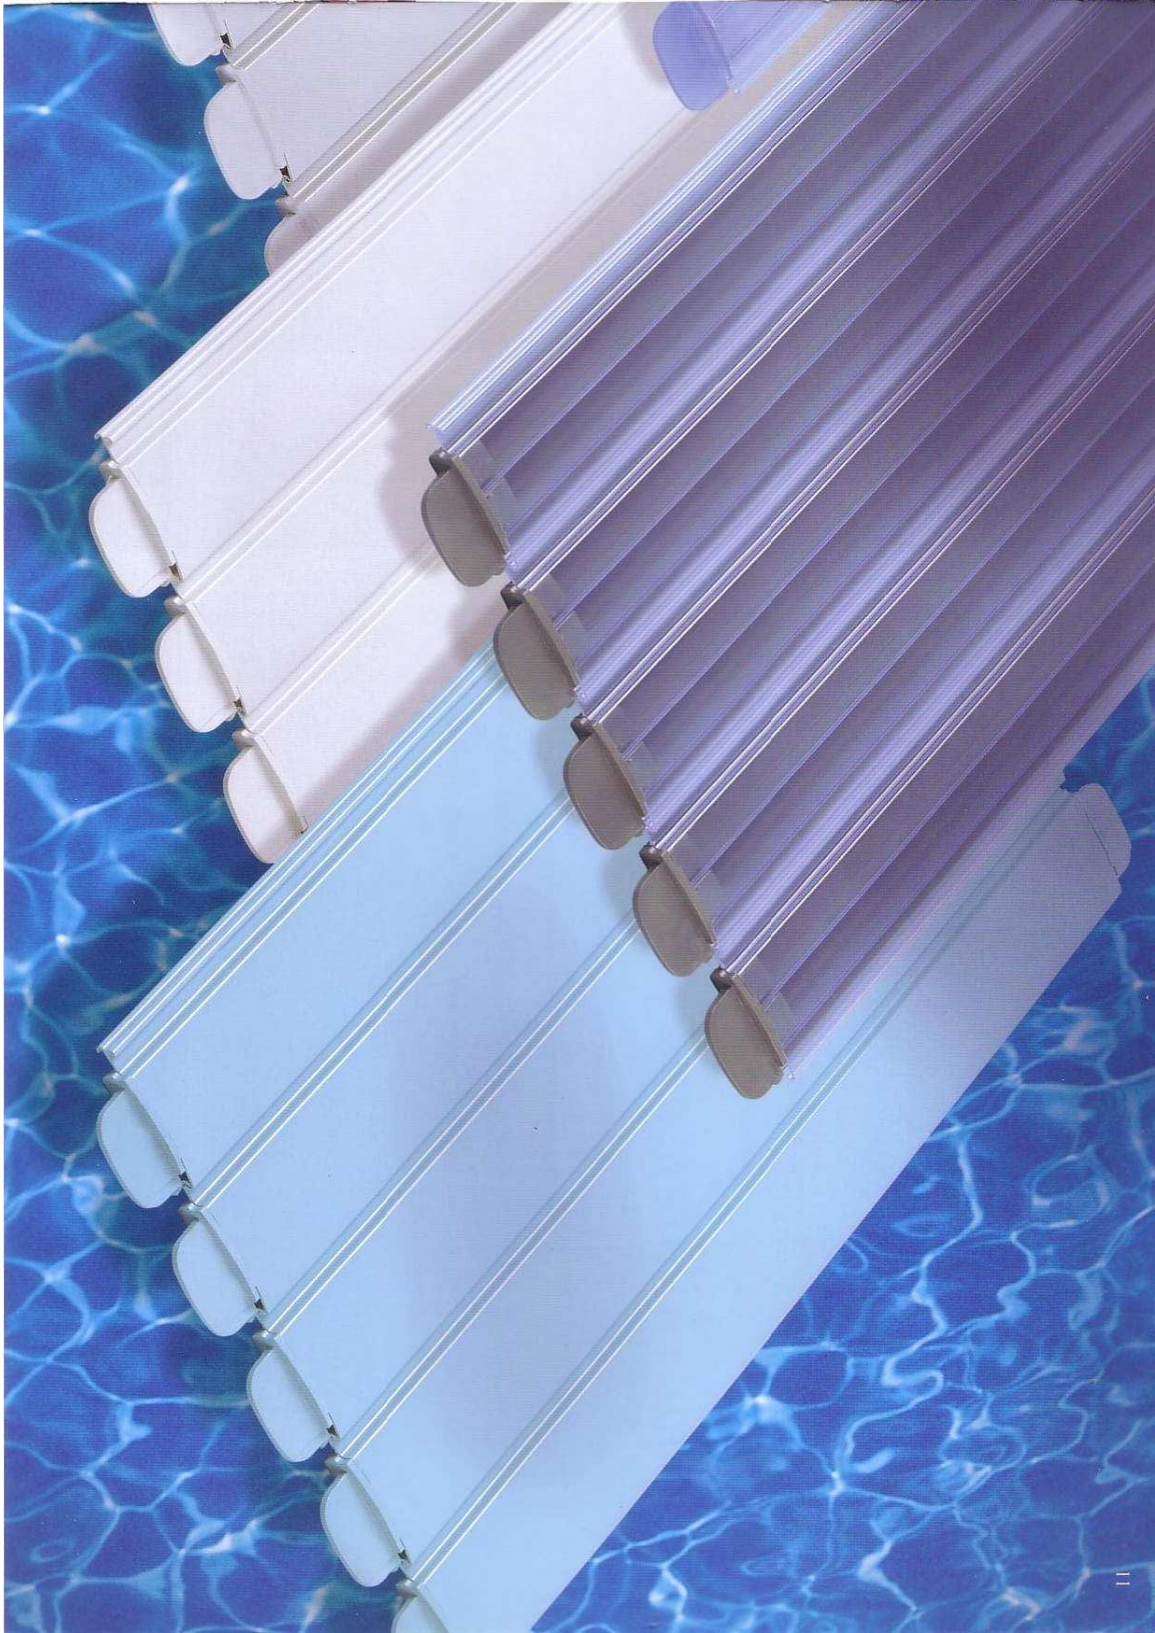

Quality on top

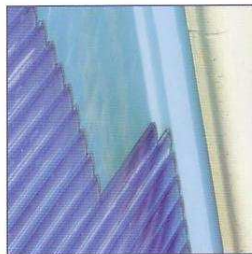

you can use the sunlight to directly heat the water in your pool. This represents a double energy saving. All versions are made from hard PVC, a high-quality, strong plastic resistant to all weather influences and with a long life. The ultrasonically welded end caps are made in the same colour as the slats and guarantee an absolutely watertight seal.

The Starline Rolldeck not only saves energy and maintenance, but also provides additional safety for (small) children and pets. The strong, hard PVC slats form

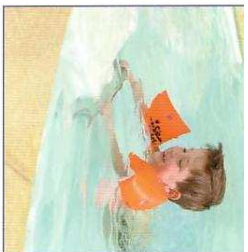

Safe for children and pets

a very sturdy structure. With a simple device that supports the slats along the sides of the swimming pool and a specially designed electro-mechanical locking device*, you have a safe cover. Children and animals can play around the pool to their hearts' delight, without you being constantly concerned for their safety.

Once the Roldeck has reached the closed position, the safety lock will automatically engage. A stainless steel brace, invisibly mounted along the edge of the pool, then grips the special loop on the slat. This is fully automatic so you cannot forget to safely lock your cover in place. When you open the Roldeck, the lock will automatically open before the cover moves.

* The electro-mechanical lock facility is only available with Starline Marathon swimming pools.

A long, useful life is guaranteed by the use of top quality materials. Thanks to 30 years of experience, Starline Roldeck's quality, user-friendliness and reliability are unsurpassed. By using state-of-the-art manufacturing techniques, we are also able to create a product that can always be made exactly to size and that delivers

A cover that will last

trouble-free functioning. Every Roldeck is given an extra quality inspection upon leaving the factory and supplied ready for assembly with all the necessary parts and materials. In this way, Starline guarantees you a cover that will give you a great deal of pleasure and convenience. As well as looking out of this world,

The optional In-Roller motor is a highly sophisticated piece of technology. A maintenance-free system with a flawless action.

Benefits of the In-Roller motor:

- highly advanced drive system (nitrogen-filled)
- motor diagnosis without disassembly
- high-output drive with extremely long life
- superbly suited for swimming pool renovations
- no motor pit necessary
- no holes required in the pool slides under water
- optimum stability thanks to multi-point bearings
- possibility for free running (so your pool can always be covered)
- 100% safe - thanks to low voltage
- sensor-controlled limit stop

Technical specifications Starline Roller	
Material:	Hard PVC
Weight:	approx. 4.8 kg/m ²
Colours:	White, Blue, Grey, Transparent, Solar (transparent top surface / black underside)
End studs:	PVC in the same colour as the slats / ultrasonic welding
Control:	RD2000 - microprocessor controlled (approx) 230V / 24V
Drive:	24 V separate drive motor or built-in tube motor
Isolating value:	4 to 6 W/m ² K (depending on wind speed/direction)
Energy saving:	Indoor pool up to 70%, outdoor pool 60 to 80%
