

# Zodiac Ei

*saltwater chlorinator*

Designed with the gentle art of relaxation in mind, the **Ei chlorinator** is quick and easy to install, operate and maintain giving you more time to perfect your relaxation techniques.

You could be enjoying your own saltwater pool in less than 15 minutes.

**ZODIAC®**

*a better life*

## Right from the word go everything about the Zodiac Ei is designed to be easy...

### Easy to Install

The compact cell design and easy to set up controls means it can be installed by your local pool shop in less than 15 minutes. Or if you consider yourself pretty handy you could easily install it yourself. Plus the patented quickfit system means you don't even have to remove the old chlorinator cell (if you already have a saltwater pool). Just disconnect the power, install the cell alongside the old one and plug in the power pack, viola you are ready to go!

### Easy to Operate

The control panel is very intuitive and easy to follow. Set the clock, add in the times you want your Ei to operate throughout the day. Then simply set the output to suit your pool and climate. If there are any problems the control panel is equipped with LED's to alert you.

### Easy to Maintain

The process of saltwater chlorination is a fascinating and complex subject (too complex to discuss here) but let's just say that you need some really clever and well constructed materials to make it all work,

otherwise you will spend as much time maintaining the product as you will swimming.

Zodiac use nothing but the best and we incorporate reverse polarity (self cleaning) technology to keep cell cleaning to a bare minimum. Plus the clear housing makes it easy to see when it needs any attention.

Ei comes in 2 sizes, compact and mid size, use this graph to see which size you will need to suit your pool in your climate.

## Specifications Chart

Description	Ei Compact	Ei Mid Size
Output capacity (Cl gas)	18gm/hr	25gm/hr
Maximum* average pool size	40,000 litres	70,000 litres
